## **Event Report**

### **Hands on Training on 3D Printing Technology (15<sup>th</sup>-17<sup>th</sup> March 2023)**

Three days Workshop on "Hands on Training on 3D Printing Technology" was organized by the Department of Mechanical and Automation Engineering and Mechanical Engineering in association with the Institute Innovation Council (IIC) and 3D Space club, MAIT during 15th March 2023 to 17th March 2023. The primary objective of the program was to provide participants with a basic understanding of the 3D printing, its applications, and printing techniques as well as opportunities to design and 3D print the product.

The workshop focused on the interests of students from different academic fields who were enthusiastic about exploring the latest developments and technologies related to 3D Printing. The program was comprised of a series of informative lectures, demonstration of 3D printed model, with members of the society acting as the primary speakers. The workshop effectively met its objectives, with participants gaining valuable insights into the latest trends and technologies in 3D printing, as well as learning about the Slicing software. Participants also had the opportunity to engage with society members who are experts in the field, and to network with them. Overall, the program was highly successful, with participants giving positive feedback regarding the quality and relevance of the topics covered.
