Workshop on "Problem Solving Approach Based Psychological Assessment Tool"

The Department of Mechanical and Automation Engineering and Department of Mechanical Engineering in collaboration with DRDO, organized a workshop focused on the Problem-Solving Approach Based Psychological Assessment Tool on March 18th, 2024. The event aimed to introduce participants to innovative methodologies in psychological assessment, particularly emphasizing problem-solving techniques.

Experts Dr. Nity Sharma, Scientist E and Dr. Sandhya Verma, Scientist E from DRDO, shared invaluable insights during the sessions. The speakers provided an overview of the significance of problem-solving techniques in psychological assessment, highlighting their relevance in various domains. Participants were introduced to a novel Psychological Assessment Tool developed by DRDO, focusing on its application in real-world scenarios. Through case studies and practical demonstrations, attendees gained insights into the practical implementation of the assessment tool. Real-life scenarios were analyzed to illustrate its effectiveness. The workshop incorporated interactive sessions where participants actively engaged with the speakers, clarifying doubts and discussing potential applications of the assessment tool. The event was efficiently coordinated by Dr. Sachin Gupta, Dr. Narinder Kaushik and Mr. Harsh Joshi under the guidance of Prof. Ved Nath Mathur (HoD, MAE) and Dr. Vaibhav Jain (HoD, ME). Their efforts ensured the smooth execution of the workshop. With 12 esteemed faculty members and 25 eager third and final-year students in attendance, the workshop delved into innovative methodologies for psychological assessment, fostering collaboration and empowering attendees with practical skills.
