

## Symposium on ‘Nascent Mechanical Techniques for Global Challenges of Sustainability’

Department of Mechanical and Automation Engineering and Department of Mechanical Engineering, MAIT organized a symposium on ‘**Nascent Mechanical Techniques for Global Challenges of Sustainability**’ in association with ASHRAE India Chapter from 25<sup>th</sup>-26<sup>th</sup> February 2020.

The symposium was an initiative towards encouraging and appreciating the project and research work carried out by students, academicians, industry experts and research scholars, to meet the Global Challenges of Sustainability. This symposium was followed by paper presentation in technical sessions. In addition, keynote lectures, presentation by industry professionals and academicians was also conducted during the event. Mr. Darryl K Boyce (President, ASHRAE 2020), Mr. Jeff Littleton. (Vice President, ASHRAE), Mr. K.K. Mitra (RAL, Regional Lecturer), Dr. Rajinder Singh (Chair Student Activity, AIC) participated in the same as a keynote speaker. Such interactions facilitated better understanding about nascent technological developments in the field of Mechanical Engineering all across the globe amongst the peers.
